

## Intelligent Secure Trustable Things

**InSecTT**  
Going to the edge – Bringing the Internet of Things and Artificial Intelligence together

**It is time to bring the Internet of Things and Artificial Intelligence together – the two main drivers of innovation and industrial upgrading.**

The pan-European project InSecTT will provide **intelligent, secure and trustworthy systems for industrial applications** as well as **comprehensive, cost-efficient solutions of intelligent, end-to-end secure, trustworthy connectivity and interoperability**.

The project, coordinated by VIRTUAL VEHICLE, unites top international industry and research partners. The project aims at creating trust in AI-based intelligent systems and solutions as a major part of the **Artificial Intelligence of Things (AIoT)**.

### InSecTT- Facts

- Fosters cooperation between big industrial players from various domains, a number of highly innovative SMEs distributed all over Europe and cutting-edge research organisations and universities
- Big variety of industry-driven use cases embedded into various application domains
- Demonstration of InSecTT solutions in well-known real-world environments
- InSecTT will bring intelligent solutions into the market by conclusive showcases all over Europe, hence strengthening Europe's industry and once more make European solutions a frontrunner in cutting-edge technology..

### InSecTT- Focus

- Intelligent processing of data applications
- Industrial-grade secure, safe and reliable solutions
- Increase trust for user acceptance
- Developing solutions for Internet of Things
- Re-usable solutions across industrial domains
